

BRAND GUIDELINES

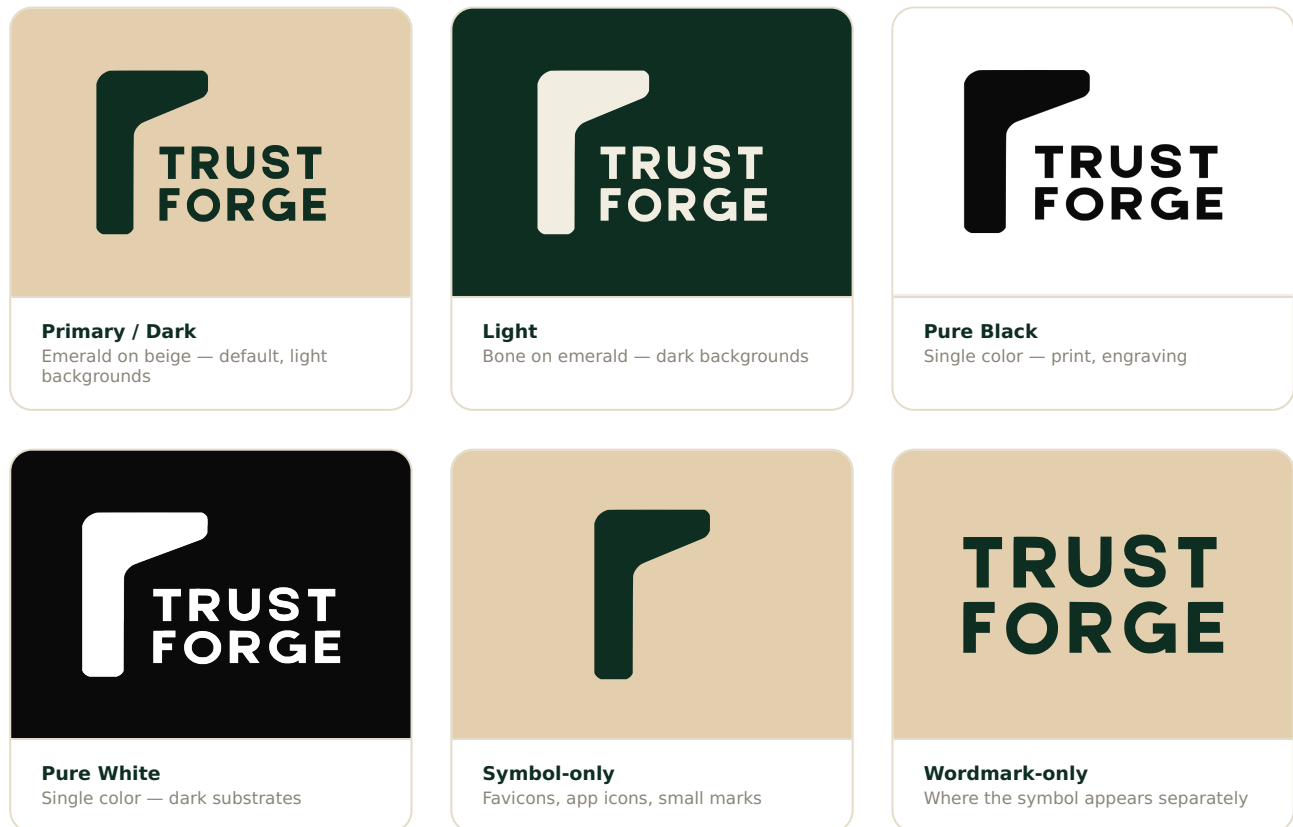

Every Decision Starts With Trust.

Trust isn't claimed. It's forged.

VERSION 1.0 · LOCKED IDENTITY · AUGUST 2026

Primary Logo & Variations

The TrustForge mark pairs a continuous ribbon symbol with a bold geometric wordmark. This exact geometry is locked — every version below is a color or crop treatment of the same approved artwork, never a redraw.

Clear Space & Minimum Size

Protecting the mark's edges keeps it legible and undiluted at every scale.

Minimum clear space

Equal to the full height of the symbol, measured on all four sides of any lockup. No text, edge, or competing graphic may enter this margin.

Minimum digital size

24px symbol height standalone; full lockup legible from 90px width up.

Minimum print size

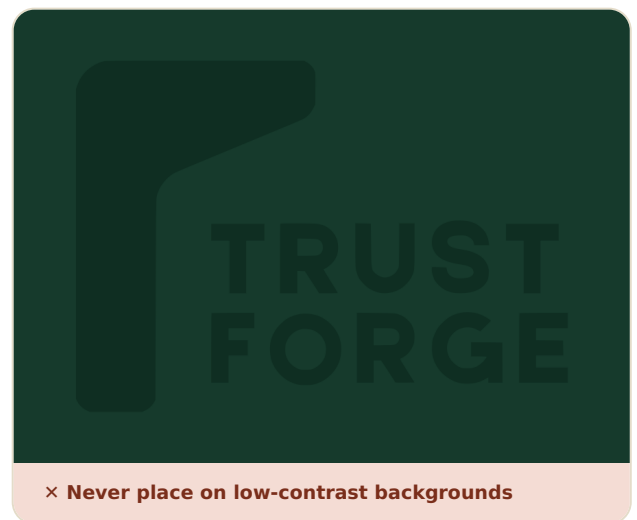

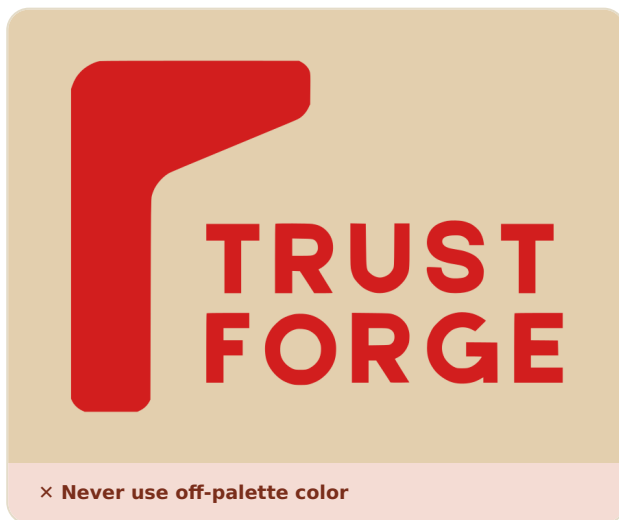

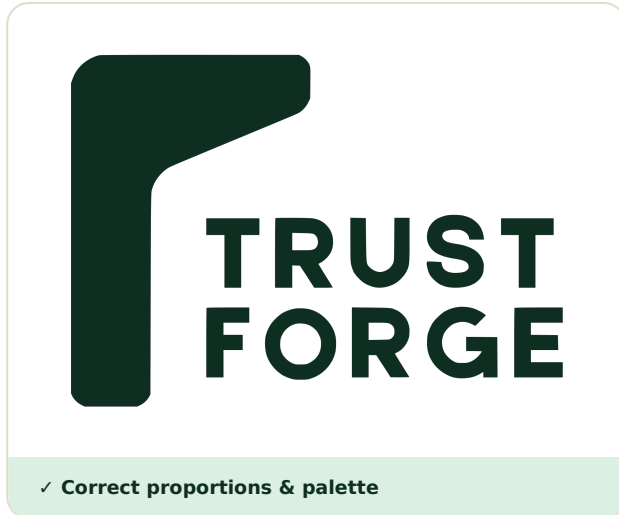

10mm symbol height standalone; full lockup no smaller than 30mm wide.

Symbol-to-wordmark ratio

Symbol height equals the cap-height of the two-line wordmark, aligned on the shared vertical center line.

Correct & Incorrect Usage

The mark must always appear exactly as approved — undistorted, on-palette, and with enough contrast to read cleanly.

Emerald + Beige / Bone

The finalized, locked palette. No other colors are approved for primary brand use.

Deep Emerald
HEX #0F2E22
RGB 15, 46, 34
CMYK 78, 33, 63, 55

Soft Bone
HEX #F2EDE1
RGB 242, 237, 225
CMYK 3, 3, 9, 0

CONTEXT	FOREGROUND	BACKGROUND
Light background (default)	Deep Emerald #0F2E22	Warm Beige #E3CFAE
Dark background	Soft Bone #F2EDE1	Deep Emerald #0F2E22
Print — light stock	Deep Emerald (CMYK 78,33,63,55)	Uncoated beige / cream stock
Digital UI	Deep Emerald #0F2E22	Warm Beige #E3CFAE or #FFFFFF

General Sans + IBM Plex Sans

Both typefaces are free for commercial use and specified in the finalized brand kit — no substitutions.

PRIMARY — GENERAL SANS

Aa Trust, Forged

A grotesk sans with humanist terminals — reads as engineered and enterprise-grade without feeling cold. Used for the wordmark, headlines, UI and dashboard labels.

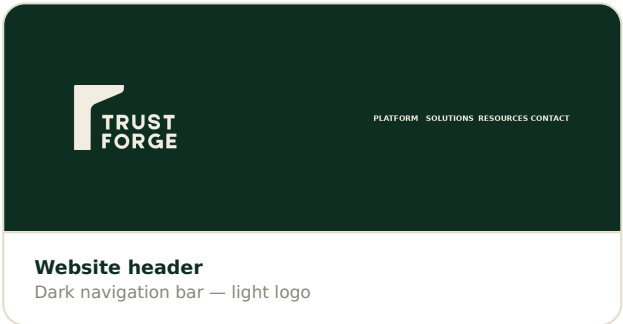

SECONDARY — IBM PLEX SANS

The report is ready for review.

Built for interface and document density, with strong multi-script support relevant to an India-first platform. Used for body copy, tables, and compliance certificates.

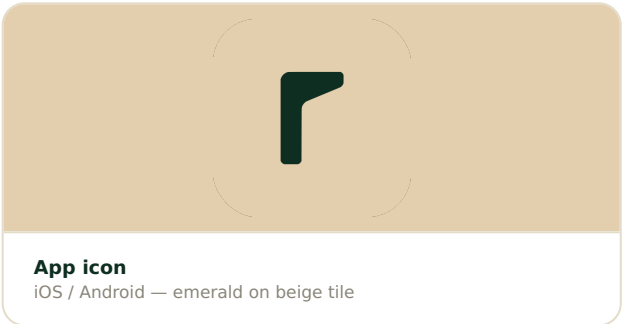

Digital & Print Applications

The same locked artwork, applied consistently across common brand touchpoints.
